INVESTMENT STRATEGY

The fund seeks to manage risk to capital and provide attractive returns for long-term capital appreciation. The fund utilizes an active cash-hedged approach in an effort to protect capital against high market volatility and capture returns when markets appear favorable. Cash is used as the primary risk mitigation tool, and the strategy can raise up to 100% cash.

FUND INFORMATION

Inception Date	8/25/2014
CUSIP	00400R700
Exchange	NYSE Arca
Expense Ratio	1.14%
SEC Yield	1.30%

The Morningstar Style Box™ reveals a fund's investment strategy for equity funds, the vertical axis shows the market capitalization of the stocks owner and the horizontal axis shows investment style (value, blend, growth). Sector and allocation holdings subject to change at any time and are not recommendations to buy or sell any security.

Sectors and holdings are subject to change at any time and are not recommendations to buy or sell any security.

DISCLOSURES

An investment in the Fund is subject to investment risk, including the possible loss of principal amount invested. There is no guarantee the Advisor's investment strategy will be successful. High yielding stocks may be speculative, higher risk investments. It is possible these companies could pay out more than they can support and may reduce or stop paying dividends at any time, which could have a material adverse effect on the companies' stock price and the Fund's performance.

Small and medium capitalization companies may involve greater volatility than investing in larger and more established companies. Foreign and emerging market securities carry additional risks such as currency fluctuation, economic or financial instability, lack of timely or reliable financial information, or unfavorable political or legal developments. If the Fund invests all or a substantial portion of its assets in cash for extended periods of time, it could reduce the Fund's potential return and prevent the Fund from achieving its investment objective or lag other investment instruments.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Owners of the shares may acquire those shares from the Fund and tender those shares for redemption to the Fund in creation units only. Market returns are based upon the midpoint of the bid-ask spread at 4:00pm EST (when NAV is normally determined for most ETFs). A fund's NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding. Market price returns do not represent the returns you would receive if you traded shares at other times.

SEC Yield: reflects the dividends and interest earned during the most recent 30-day period covered by the Fund's filings with the SEC, after the deduction of the Fund's expenses. **Alpha:** measure of risk-adjusted excess return. Positive Alpha indicates the portfolio has performed better than its level of risk (measured by Beta) would predict. **Beta:** measure of volatility relative to a given index; Beta above 1 is more volatile than the index; Beta less than 1 is less volatile. **Up and Down Capture Ratios:** used to evaluate how well a manager performed relative to an index during periods when the index is up or down. **Maximum Drawdown:** measures the peak-to-trough loss of an investment, indicating capital preservation. **Standard Deviation:** measure of volatility; greater STD indicates a more volatile strategy or index during a given time period. **Russell 3000 Value TR Index:** comprised of Russell 3000 companies with lower predicted and historical growth rates. **Credit Suisse Hedge Fund USD:** an asset-weighted hedge fund index using the Credit Suisse Hedge Fund Database, which tracks approximately 9,000 funds with a minimum of US \$50 million under management, a 12-month track record, and audited financial statements. The index is calculated and rebalanced on a monthly basis, and reflects performance net of all hedge fund component performance fees and expenses. Indexes are unmanaged. It is not possible to invest directly in an index.
